

New Features and Enhancements in MyEducation BC

The following new features and enhancements have been implemented in MyEducation BC:

Graduation Reports Updated to Include the Literacy 12 Graduation Assessment

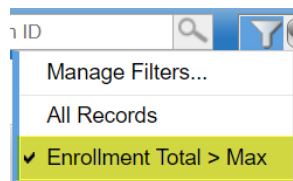

Reports that school counsellors use to evaluate student progress toward graduation have been updated to include the new Literacy 12 graduation assessment. Updates have been applied to the DVR, Permanent Student Record, Not Meeting Graduation Requirements report, and Not Meeting Graduation Requirements by Counsellor report. Updates to School Transcripts are in progress.

Quick Navigation to Find Course Sections with Enrolment Greater than Maximum in Schedule Master (School and Build View)

Filters have been added to allow school staff to track the number of students in a particular course section that has an enrolment total greater than the enrollment maximum. Allows school admins to flag course sections (or classes groupings) that are not in compliance with teacher collective agreements. The table is available in:

School View > Schedule top tab > Master side tab > Classes sub-side tab OR

Build View > Scenario > Workspace top tab > Master side tab > Classes sub-side tab

BC Class Attendance Letter

The BC Class Attendance letter has been formatted to include the school address and school name when printed, making it look more like an official letter. Cosmetic fixes have been made to the parent section, and unnecessary headers have been removed.

BC Principal's Attendance by Class Report – Group by Grade Option

School View > Attendance Top Tab > Class Office Side Tab > Reports > BC Principal's Attendance by Class Report

An option has been added to group the results by grade. This change allows school administrators to view individual grades on fewer pages and produce per grade reports to the appropriate grade counsellor(s).

TRAX Extract Excludes Grade for CLE and CLC

Career Life Education (CLE) and Career Life (CLC) do not have a grade level associated with them. This change modifies the TRAX.crs extract to exclude a grade level for these courses when MIDS courses have the CLE and CLC related course codes. This change will prevent TRAX upload validation errors with CLE and CLC related courses

For guidance on working with TRAX extracts, please see the [TRAX guide](#).

Student Details Address Field Label Updated

The student details address field label was updated from “Physical Address > Proof of Address” to “Proof of Address/Residence” on the student Details page >Addresses tab.
